Practicing Typing - HOW IT CAN HELP!

JUST FYI: Do you want to learn how to type fast? **Key Hero** is a typing test but it's also really good if you want to learn touch typing or other techniques to type faster.

A lot of apps have been written to help people improve their typing skills. The difference between **Key Hero** and the other applications is that it's an online free solution. You won't have to install a thing. You just need any web browser and flash player to start improving your typing skills. Another important feature of the site is all the performance stats. When you are a registered user, you can view a chart of your typing tests and see how you are improving. You can also see your accuracy and how you have progressed.

You can get rid of typing software and half-baked typing games. **Key Hero** has everything you need to make you into an A-class typing master.

You will soon speed up your typing if you use the site regularly. I believe that if you practice 5 minutes per day during a month you will greatly improve your speed. Your wpm can easily go from 15 wpm to 40 wpm. Trust me this free typing test is good. Whether you are a good typist or not, it will help you get better. Any increase in your typing speed will help you have a better experience when you are using computers.

I have tested many games before I decided to create my own. The typing games I found aren't very good. Some of them might be fun for a while but they are not really helping you become a better typist. The problem is that they encourage bad habits. Many of them don't take into account the mistakes you make. This is what you were talking about Elsa!!! See below!

For example, let's say you have a game where letters are falling and you have to type them as fast as possible. What's happening when you make a mistake, nothing! You don't have to hit delete to fix your errors. This is silly because if you write an email and make some errors while typing, you have to fix them. Those games don't mirror what you are doing when you use a computer for real. Key Hero does. Here is her link to Typing Hero:

<http://www.keyhero.com/typing-practice/>

Typing test link; you need to correct your mistakes using the delete key; as you take the typing test.
